Experiencia

Intergas del Norte S.A de C.V | Front-end Developer *(2/2023 – 09/2023)*

Developed internal software using **Laravel**, **SQLserver**, **DBeaver**, **Insomnia**, **Devexpress**, **Mui**, **Tailwind**, **SCSS**, **SASS**, **BEM**, **Git**, **Github**. **Responsible for all Front-end work.**

ItPartner | Fullstack Developer *(11/2021 – 1/2023)*

Developed internal software using **Laravel, Angular, Flutter, Blade, JavaScript, MySQL, Dart, TypeScript, Insomnia, XAMPP, Git, Github, Android Studio, UI/UX, Figma, SweetAlert, BEM**

Proyectos

SaveRoom | Proyecto Integrador (code here)

I developed a monitoring system for parents using 6 physical **sensors**. The sensors send data through **Adafruit**, which is processed by a **Laravel API**. This data is then presented to parents in an **Angular** dashboard, soon to be available for **Mobile**. Users can view sensor records with intervals of 15 seconds, 30 seconds, and 2 minutes, as well as filter records by date.

Anbiel Ecommerce |Proyecto Personal (code here)

I initially developed a **mobile** application using **Kotlin**, **XML**, and **Firebase**, including notifications and a user interface designed in **Figma**. Now, I am working on a new version using **Kotlin Jetpack Compose** and **NestJS**, with a **MySQL database**. I am also implementing push notifications, **JWT authentication**, and payment methods with Mercado Pago and Stripe. I'm using **Dagger Hilt** for **dependency injection**, as well as **Flow**, **Room**, **Retrofit**, and **Clean Architecture**. The project is still in development, and I have a **Google Play Console account**.

Resumen

I am a **junior software developer** with strong skills in both **Front-End** and **Back-End** development. My main focus is mobile development in **Kotlin/Java,** although I also have experience as a **Fullstack web developer**. I am **self-taught** and learn quickly. I am currently looking for remote job opportunities in mobile development, where I can continue to grow and excel in this area that I am passionate about.

Estudios

- **UTT** | Desarrollo de Software | 2021-Current
- **CETIS 83** | Soporte y Mantenimiento a Equipos de Computo
- **COURSERA**| Desarrollo de Aplicaciones Android de **Meta**
